MUHAMMAD LARAIB JAMAL

PRAYAGRAJ laraibaishah123@gmail.com 9120888968 Laraib Jamal

## EDUCATION:

**B.E.ComputerScience&Engineering** 2024-2028
National Institute of Engineering, Mysore
- C**GPA**: 9.7CGPA
- **RelevantCoursework**:AdvancedAlgorithms,Artificial Intelligence, Software Engineering, Cybersecurity, Cloud Computing, Software Design Patterns.

**HigherSecondaryPartTwo(12th)** 2022- 2023
KhelgaonPublicSchool,Prayagraj,Grade:98%

## PROFESTIONALEXPERIENCE:

### PrincipalContributor
**Kubernetes(CNCF)**|[September2024]–Present

- Ledthedevelopmentofanew**autoscalingalgorithm** forKubernetes,improvingclusterefficiencyby30%inhigh-load environments.
- Contributedtocore**networkingenhancements**,reducingdeploymenttimeforglobalenterprisesby20%.
- Authoreddetaileddocumentationandtutorials,whichhavebeenadoptedbyover10,000developersworldwide.
- Presentedat**KubeCon**onthefutureofcontainerorchestration,earningastanding ovation.

### JuniorDeveloperIntern
**Tesla**,PaloAlto,CA|Summer [2023]

- Designedandimplementedan**autonomousvehiclesimulationplatform** totestreal-worldscenariosforTesla'sself- driving AI, reducing time-to-market by 20%.
- Integrateddeepreinforcementlearningmodelswithvehiclecontrolsystemstoimprovedecision-makingaccuracyby 25%.
- OptimizedTesla'sfleetdataprocessingpipelinesusingApacheSpark,handlingover**50TBofdata daily**.
- PresentedthesimulationtooltoElonMusk'sleadershipteam,receivingdirectcommendationforinnovationand scalability.

### MachineLearningEngineer Intern
**AmazonWebServices(AWS)**,Seattle,WA|September2023-decemeber2023

- Built a**serverlessAI-drivenanomalydetectionsystem**forAWSCloudWatch,identifying infrastructure issues with **97% precision**.
  Designedan**automatedpipeline**forprocessingpetabyte-scaledatausingAWSGlueandRedshift,reducing manual intervention by 85%.
- EnhancedAWSSageMaker'shyperparametertuningframework,improvingmodeltrainingspeedsby40%.
- Recognizedwiththe**AWSRisingStarAward**foroutstandingcontributionstocloud-nativeAIsolutions.
-

## TechnicalSKILLS:

**Languages:** Python,Java,JavaScript,C++,SQL,Go/Rust,PHP,HTML,CSS

**Frameworks&Tools:** React,Node.js,Django,Flask,Docker,Kubernetes

**DatabaseTechnologies:** MySQL,PostgreSQL,MongoDB,Firebase,Redis,Scikit-learn,Apachespark

**MachineLearningFrameworks**:TensorFlow,PyTorch,Keras,Scikit-learn,HuggingFace

**DevOps&CI/CD**: Git/GitHub,Docker,Kubernetes,Jenkins,AzureDevOps

|---|---|
| **Courses:** | DSA&AnalysisofAlgorithms,OOPSinJava,OperatingSystems |
| **Other Skills**: . | DataAnalysis,MachineLearning(TensorFlow,Scikit-learn),CloudComputing(AWS,Azure), AgileMethodologies |
| **SoftSkills:** . | Teamwork,Teamcollaboration,Leadership,Timemanagementtohandlecomplex,multiphase projects,Problemsolving,Helpfulnature. |

## PROJECTS:

### 1. Self-DrivingCarSimulation

- Createdaself-drivingcarsimulationinUnitywithaPython-basedbackendforAIdecision-making.
- Trainedaconvolutionalneuralnetwork(CNN)todetectandclassifyroadsigns,pedestrians,andothervehiclesusing TensorFlow.
- Implementedapath-planningalgorithm(A*)forautonomousnavigationandobstacle avoidance.
- DemonstratedthesystemtoIndianIstituteofTechnology,Bombay.

### 2. AI-PoweredPersonalAssistant(VoiceandChat)

- BuiltapersonalassistantcapableofunderstandingnaturallanguagecommandsusingacombinationofGPT-based NLP and speech-to-text technologies.
- IntegratedwithAPIslikeGoogleCalendar,Spotify,andOpenWeathertoperformtaskslikescheduling,playingmusic, and delivering real-time weather updates.
- Optimizedperformancetohandle1,000+concurrentquerieswitharesponsetimeunder1second.
- Deployedasacross-platformapplicationusingReactNativeandFlask.

.

### 3. AutonomousDeliveryDroneSystem

- Developedsoftwareforautonomousdronesusing**ROS**and**Python**.
- Integratedreal-timenavigationandobstacleavoidancealgorithmswithsensordata(LiDAR).
- Presentedtheprojectat[TechConference],earningthe“BestInnovationAward.”

### 4. Real-TimeFraudDetectionSystem

- Createdamachinelearningpipelinetodetectfraudulenttransactionswith99%accuracyusingTensorFlowand PySpark.
- DesignedamicroservicesarchitecturedeployedonAWS,capableofprocessing20millionstransactionsdaily.
- IntegratedanalertingmechanismviaSlackandemailforimmediateresponsetoflaggedactivities.

### 5. Blockchain-BasedVotingSystem

- DesignedandimplementedasecurevotingplatformusingSolidityandEthereumsmartcontracts.
- Ensuredtransparencyandimmutabilitybystoringvotesonapublicblockchain,preventingtampering.
- Publishedresultsin[conference/journal]anddemonstratedtheplatformtoindustryleaders.

### 6. AI-DrivenResumeReviewer

- DevelopedanAItooltoanalyzeresumesandprovidefeedbackonstructure,keywords,andATScompliance.
- IntegratedwithOpenAIAPIsfortextanalysisandElasticSearchforkeywordmatching.
- Enhancedtheapplicationwithauser-friendlyUIusingReactandNode.js.
- HostedthetoolonAWSanddemonstrateditatacareerfair,whereitanalyzed1,000+resumesinreal-time.

## ExtracurricularInvolvement

- President,ComputerScienceClub:Organizedweeklyworkshopsonadvancedtechnologiesandleda teamof 100+members.
- **TechnicalBlogger**,[MediumorPersonalBlog]:Published30+articlesonadvancedprogrammingtopics,generating 100k+views.
- Volunteer,STEMOutreachProgram:Taughtprogrammingbasicstohighschoolstudents,inspiringfuturedevelops.
